Average energy consumption over 24 hours period under normal operating conditions.

Specifications may change without notice due to continuous product development.

£210.00 (excl. VAT)

MINIBAR VENTILATION REQUIREMENTS : Very Important!

If the minibar is going to be incorporated into furniture, then it **MUST** have proper ventilation!

The minibar must not be installed closer than 120mm from the wall or situated close to any sources of heat (ie radiators, etc). (NB: Furniture housing the minibar should **NOT** be flush against the wall).

Air must be able to freely circulate around the cooling unit. The minibar should have ventilation grills under it (at least a surface of 200 cm²) - to allow cool air to enter the furniture at the base - and ventilation grills above the back by the aggregate unit - to allow the hot air to escape. Remember! Cool air in - hot air out!

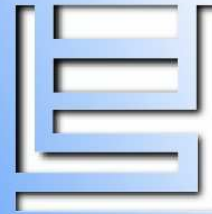

MINIMUM FURNITURE DIMENSIONS

The minimum correct internal dimensions for furniture to house a minibar are as follows:

Minibar Type	Height	Width	Depth
Primo 30	530 mm	415 mm	445 mm

NB: Please note that in order for the minibar to operate correctly, it must be standing on a level surface!!

Inadequate ventilation can lead to malfunctioning in warm weather and will invalidate the minibar's warranty.

CORBY TROUSER PRESS

CORBY 7700

- Free-standing or Wall-mounted.
- 15, 30 & 45 minute settings.
